

EZ Vane Weathervanes

Options for Cupola Models 220, 320, & 420

EZ VANE CUPOLA BENEFITS

Our cupolas are constructed of weather-resistant, high-density polyethylene which is lightweight, impact-resistant, and will never rust, rot, or fade.

- Unique design fits nearly any roof
- The two-piece design allows you to choose a combination of top and base colors
- Maintenance-free and UV-inhibited
- 10-year limited warranty

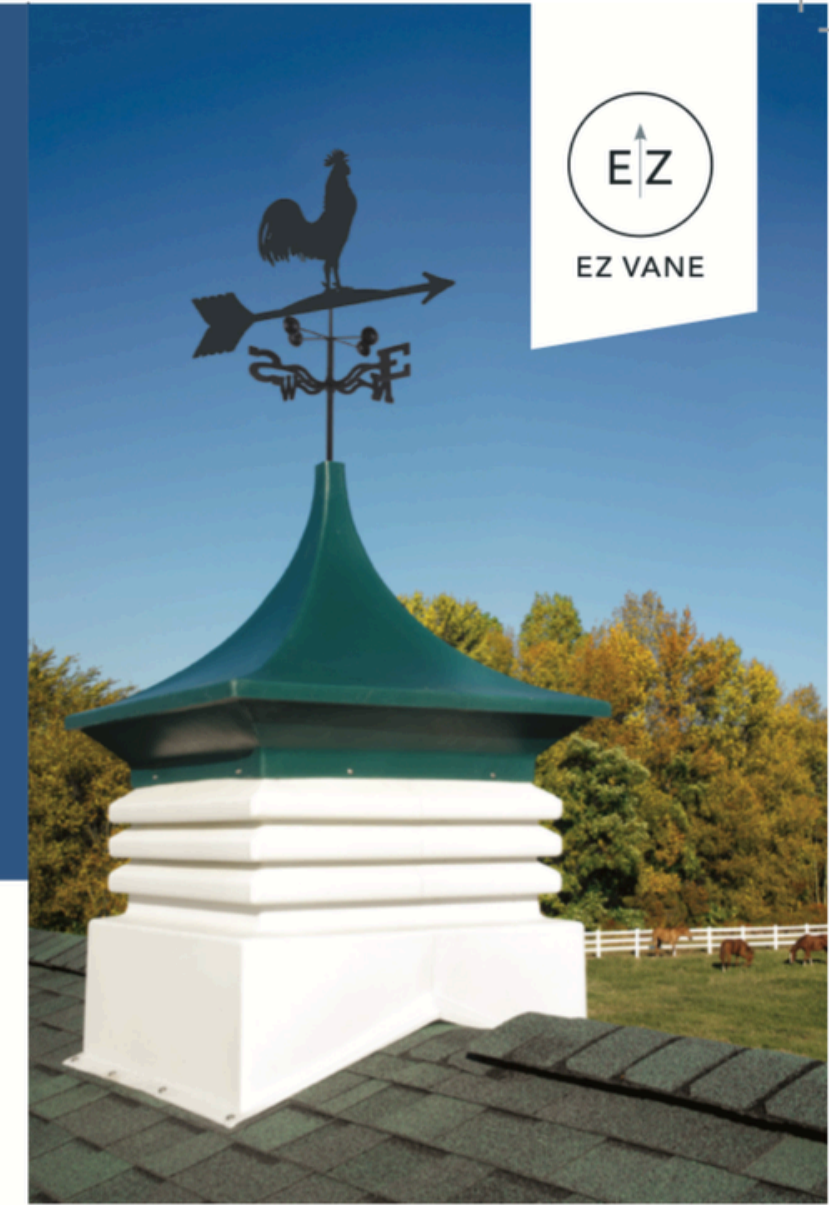

EASY TO INSTALL

Our economical and efficient design installs far more quickly and easily than any other cupola. Most cupolas have more than 30 pieces—ours has only two. Most models have three molded-in pitch guides. Simply cut the base to match your roof pitch, secure the base, and attach the top.

INSTALLATION IS AS EASY AS 1-2-3

1. Cut base to roof pitch and attach to roof.
2. Attach cupola top to base.
3. Attach weathervane to cupola.

Base may be cut to any pitch up to 8/12*. Models 220, 320, and 420 include molded-in guides for the most common pitches: 3/12, 4/12, and 5/12.

TOP IT WITH STYLE.

All of our weathervanes are handcrafted using 14-gauge solid steel. Each features a beautiful, durable, and scratch-resistant powder coat finish, as well as a baked-on clear coat finish for further protection.

CHOOSING THE IDEAL NUMBER OF CUPOLAS

A good guideline is one inch to one and a half inches of cupola base for every foot of uninterrupted roof ridge line. The chart below will help you plan your installation.

RIDGE LENGTH	OPTION 1 (QTY)	OPTION 2 (QTY)
24–32 feet	(1) Model 220	(1) Model 320
32–40 feet	(1) Model 320	(2) Model 220
40–48 feet	(2) Model 220	(2) Model 320
48–56 feet	(1) Model 420	(2) Model 320
56–64 feet	(2) Model 320	(3) Model 220
64–72 feet	(2) Model 320	(2) Model 420
72–80 feet	(2) Model 420	(3) Model 320
80 feet and up	(2) Model 420	(3) Model 320
