Important Safety Notice!

Yardistry components are intended for privacy, decorative and ornamental use only.

Product is NOT INTENDED for the following:

- A safety barrier to prevent unsupervised access to pools, hot tubs, spas or ponds.
- As load bearing support for a building, structure, heavy objects or swings.
- Used in structures that trap wind, rain or snow that would create extra load on the product.

Accumulated snow must be removed from roof.

DO NOT climb or walk on roof for any reason.

Permanent structures may require a building permit. As the purchaser and or installer of this product you are advised to consult local planning, zoning and building inspection departments for guidance on applicable building codes and/or zoning requirements.

Wood is NOT flame retardant and will burn. Grills, fire pits and chimineas are a fire hazard if placed too close to a Yardistry structure. Consult user's manual of the grill, fire pit or chimnea for safe distances from combustible materials.

Wear gloves to avoid injury from possible sharp edges of individual elements before assembly.

During installation, follow all safety warnings provided with your tools and use OHSA approved safety glasses. Some structures may require two or more people to install safely.

Check for underground utilities before digging or driving stakes into the ground!

It is important during assembly to closely follow the instructions, complete the assembly on a solid level surface and that you follow the instruction to square up, level and anchor the structure, this will reduce the gap at wood connections during assembly.

General Information

General Information: Wood components are manufactured with Cedar (C. Lanceolata) which is protected with factory applied water-based stain. Knots, small checks (cracks) and weathering are naturally occurring and do not affect the strength of the product. Annual application of a water-based water repellent sealant or stain is important and will help reduce weathering and checks.

Limited Warranty

Yardistry warrants that this product is free from defect in materials and workmanship for a period of one (1) year from the original date of purchase. In addition, for any product with lumber, all lumber is warranted for five (5) years against rot and decay. This warranty applies to the original owner and registrant and is non-transferable.

Regular maintenance is required to assure the integrity of your product and is a requirement of the warranty. This warranty does not cover any inspection costs.

This Limited Warranty does not cover:

- Labour for replacement of any defective item(s);
- Incidental or consequential damages;
- Cosmetic defects which do not affect performance or integrity;
- Vandalism; improper use or installation; acts of nature, including but not limited to wind, storms, hail, floods, excessive water exposure;
- Minor twisting, warping, checking or any other natural occurring properties of wood that do not affect performance or integrity.

Yardistry products have been designed for safety and quality. Any modifications made to the original product could damage the structural integrity of the product leading to failure and possible injury. Yardistry cannot assume any responsibility for modified products. Furthermore, modification voids any and all warranties.

This product is warranted for RESIDENTIAL USE ONLY. Yardistry disclaims all other representations and warranties of any kind, express or implied.

This Warranty gives you specific legal rights. You may have other rights as well which vary from state to state or province to province. This warranty excludes all consequential damages, however, some states/provinces do not allow the limitation or exclusion of consequential damages, and therefore this limitation may not apply to you.

Instructions for Proper Maintenance

Your Yardistry structure is designed and constructed of quality materials. As with all outdoor products it will weather and wear. To maximize the enjoyment, safety and life of your structure it is important that you, the owner, properly maintain it.

HARDWARE:

- Check metal parts for rust. If found, sand and repaint using a non-lead paint complying with 16 CFR 1303.
- Inspect and tighten all hardware after completion of assembly; after first month of use; and then annually. Do not over-tighten as to cause crushing and splintering of wood.
- Check for sharp edges or protruding screw threads, add washers if required.

WOOD PARTS:

- Applying a water repellent or stain (water-based) on a yearly basis is important maintenance to maintain maximum life and performance of the product.
- Check all wood members for deterioration, structural damage and splintering. Sand down splinters and replace deteriorated wood members. As with all wood, some checking and small cracks in grain is normal
- Some gapping may occur at some wood connections.

Assembly Guides

Tools Required:

- Tape Measure
- Carpenters Level
- Standard or Cordless Drill
- Claw Hammer
- 7/16” & 9/16” Wrench
- 8’ Step Ladder
- Safety Glasses
- Adult Helper
- Safety Gloves
- Hard Hat
- 6’ Step Ladder x 3
- Square
- Rachet
- 7/16, 1/2 & 9/16 Socket

Symbols:

Throughout these instructions symbols are provided in the top, right-hand corner of the page.

- Use Help, where this is shown, 2, 3 or 4 people are required to safely complete this step. To avoid injury or damage to the assembly make sure to get some help.

- Use a measuring tape to assure proper location

- Pre-drill a pilot hole before fastening screw or lag to prevent splitting of wood.

If you dispose of your Yardistry structure: Please disassemble and dispose of your unit so that it does not create any unreasonable hazards at the time it is discarded. Be sure to follow your local waste ordinances.

Assembly Tips

Following are some helpful tips to make the assembly process smooth and efficient.

PRE-ASSEMBLIES:
(i.e. Post and Beam Assemblies, Roof Rafter Assembly, etc)

- Work on a raised, solid and flat surface such as, a table or saw horse.
- Keep all connections flush where shown in the instructions.
- When assembling the beams keep parts flat, straight and snug when connecting.

METAL PARTS:

- Roofing material may have sharp edges, wear safety gloves.
- Remove all plastic covering, on both sides of the metal panels, directly before installing each piece.
- Place roofing material on a non-abrasive surface before and after assembly as it can bend, dent and scratch easily.
- The roofing screws can easily crush the roof panels and roof edges when using a power drill. We recommend hand tightening the roofing screws so they sit snug and tight to the roofing material.

Permanent Installation Examples

Note: It is critically important you start with square, solid and level footings, concrete pad or deck to attach your Pergola Room.

We supply Post Mounts with this structure which gives you the flexibility to permanently install your structure to a pre-existing or new wood or concrete surface.

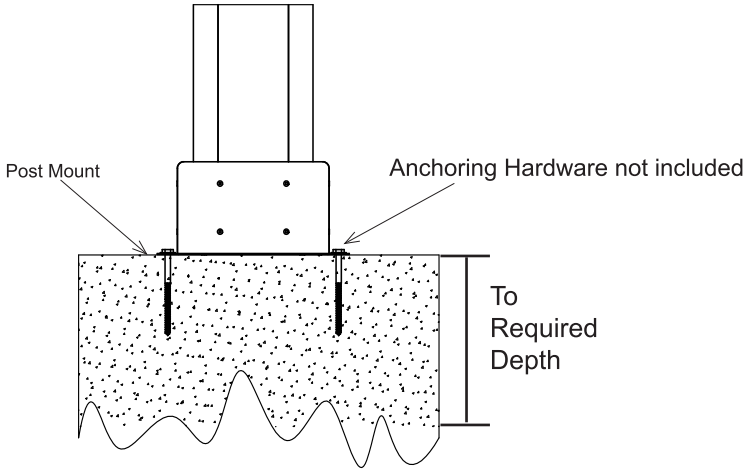

- The hardware to attach the Post Mount to the structure is included.
- The hardware to mount the structure permanently will need to be purchased separately at your local hardware store.

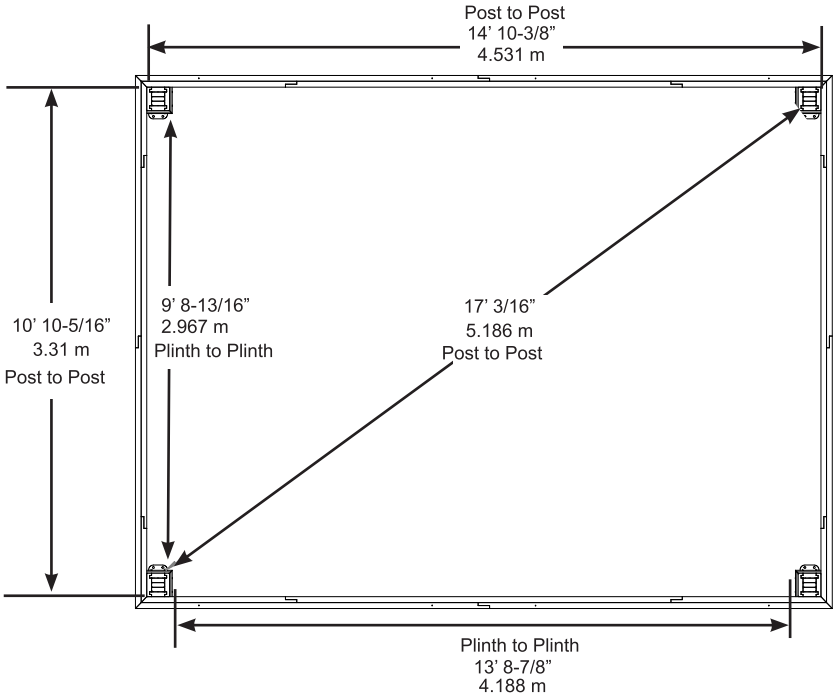

If you are mounting to concrete footers see below for the correct locations and placement. Please double check for possibility of any underground utilities such as gas, telephone, cable or sprinkler lines.

Following are some examples of how to mount the structure to wood or concrete surfaces.

Refer to your local building and city codes, ordinances, neighbourhood covenants, or height restrictions regarding this type of structure for guidance on acceptable installation requirements.

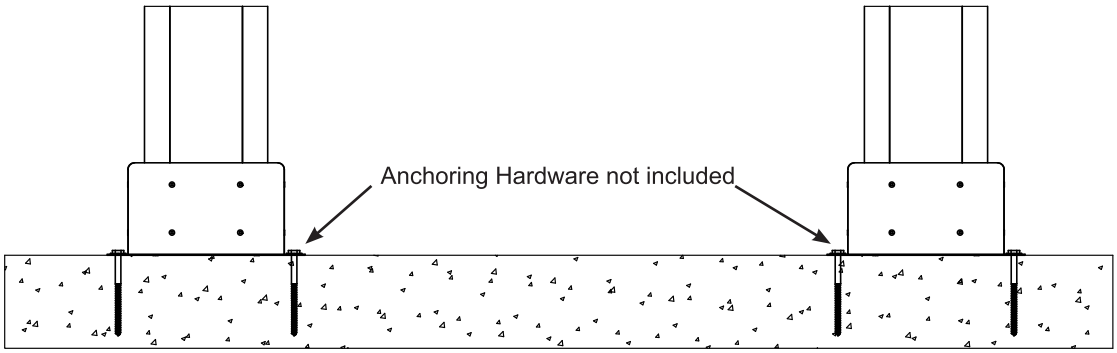

Concrete Footer

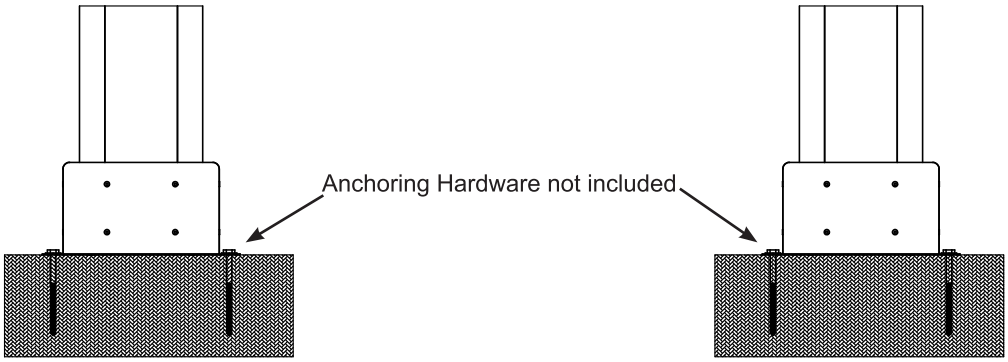

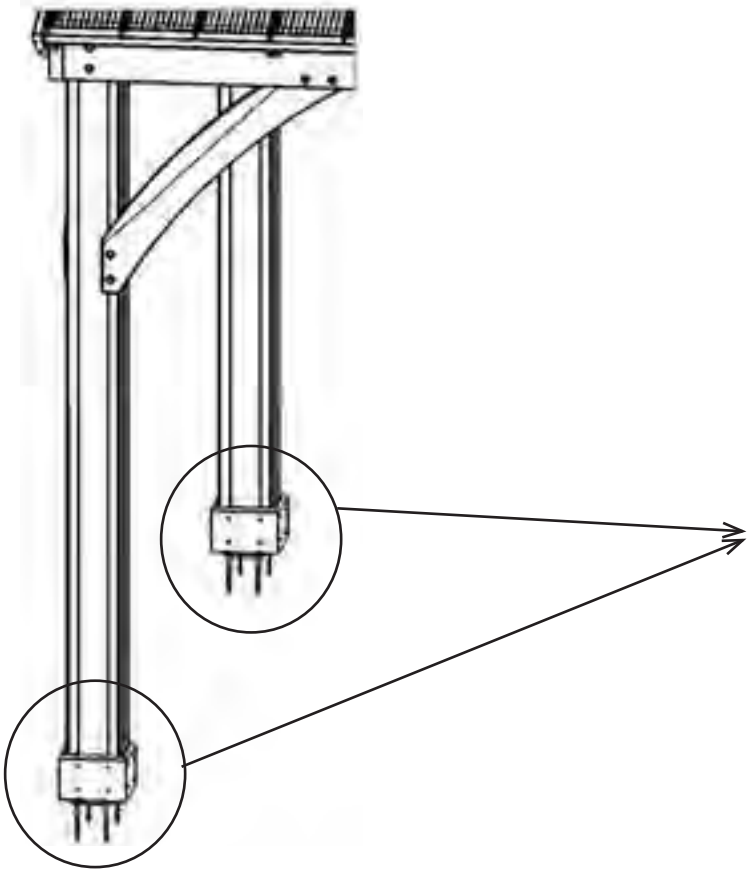

Permanent Installation Examples cont.

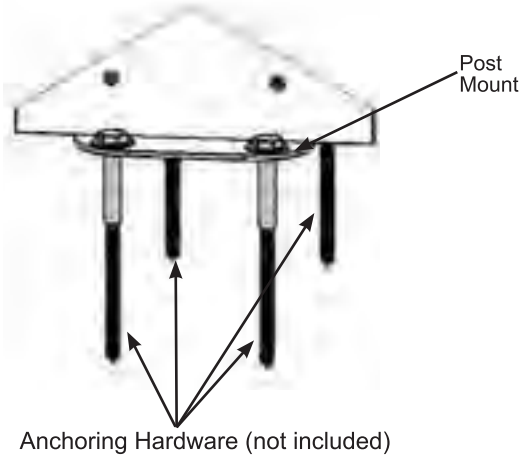

Concrete Patio [min. 11’ 10-3/8” x 15’ 10-3/8” (3.616 m x 4.836 m)] with 6” (15.24 cm) clearance on all sides

Wood Deck [min. 11’ 10-3/8” x 15’ 10-3/8” (3.616 m x 4.836 m)] with 6” (15.24 cm)clearance on all sides

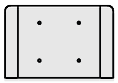

Post Mounts have a 1/2” (12.7 mm) diameter hole for anchoring hardware.

Step 1: Inventory Parts - Read This Before Starting Assembly

A. This is the time for you to inventory all your hardware, wood and accessories, referencing the parts identification sheets. This will assist you with your assembly.

- Each step indicates which bolts and/or screws you will need for assembly, as well as any flat washers, lock washers, t-nuts or lock nuts.

B. If there are any missing or damaged pieces or you need assistance with assembly please contact the consumer relations department directly. Call us before going back to the store.

1-888-509-4382
support@yardistrystructures.com

C. Read the assembly manual completely, paying special attention to ANSI warnings; notes; and safety/maintenance information on pages 1 - 4.

- Follow the instructions in order.
- This structure is designed to be assembled and installed ideally by four people, DO NOT attempt to install alone.
- Consider the slope of elevation where you plan to install the structure. Also, check for gas, telephone, other utilities or sprinkler line locations prior to excavating any holes.

D. Before you discard your cartons fill out the form below.

- The carton I.D. stamp is located on the end of each carton.
- Please retain this information for future reference. You will need this information if you contact the Consumer Relations Department.

Step 2: Post Assemblies

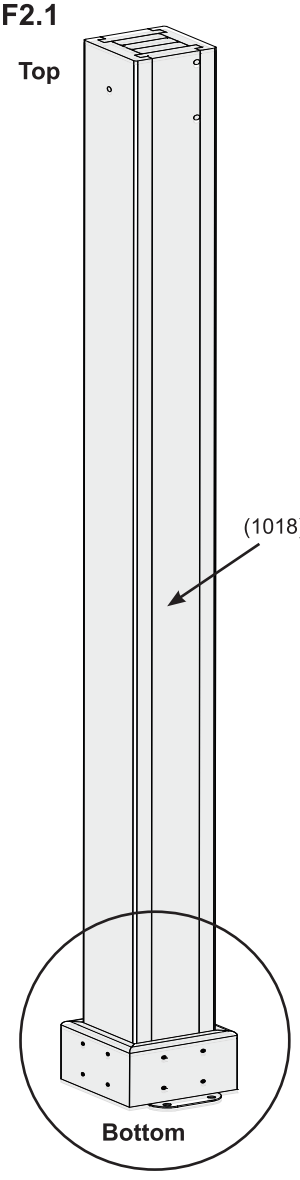

A: At the bottom of four (1018) M Posts insert two 5/16” T-Nuts as shown in F2.1 and F2.2.

B: At the bottom of each (1018) M Post place two Post Mounts tight to the bottom and inside faces as shown in F2.1 and F2.2. Loosely attach with one 5/16 x 1-1/4” Hex Bolt (with 5/16” lock washer and 1/4-5/16” large washer) per mount so they connect to the T-Nuts.

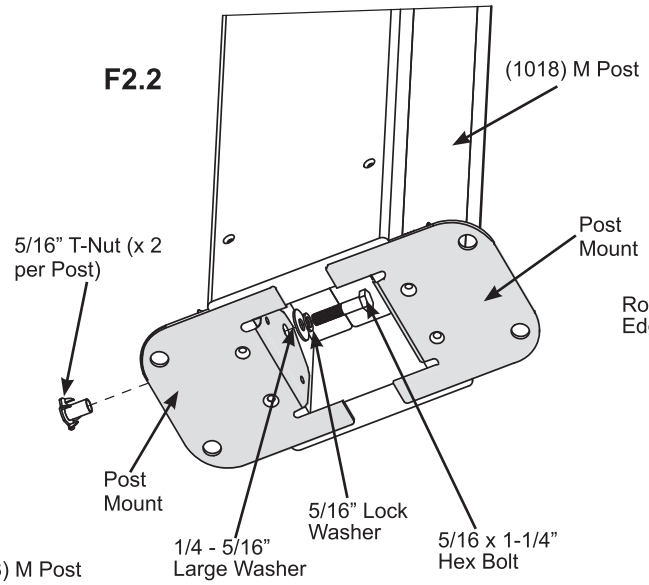

C: On each side of the Posts, place one (422) Plinth flush to the bottom and attach with four #8 x 1-1/2” Wood Screws per plinth. Rounded edges on top. (F2.1 and F2.3)

D: From the bottom of each Post Mount attach to posts with two #8 x 1-1/2” Wood Screws per mount and then from the inside with two #10 x 1-1/4” Pan Screws per mount These screws are installed at a slight angle. Tighten all bolts. There will be four M Post Assemblies. (F2.4)

Step 3: Short Beam Assembly
Part 1

A: Connect one (660) Left Beam Short and one (661) Right Beam Short using three 5/16 x 1-1/2” Hex Bolts (with 5/16” lock washer, 1/4-5/16” large washer and 5/16” t-nut) as shown in F3.1 and F3.2. Notice orientation of bolt heads.

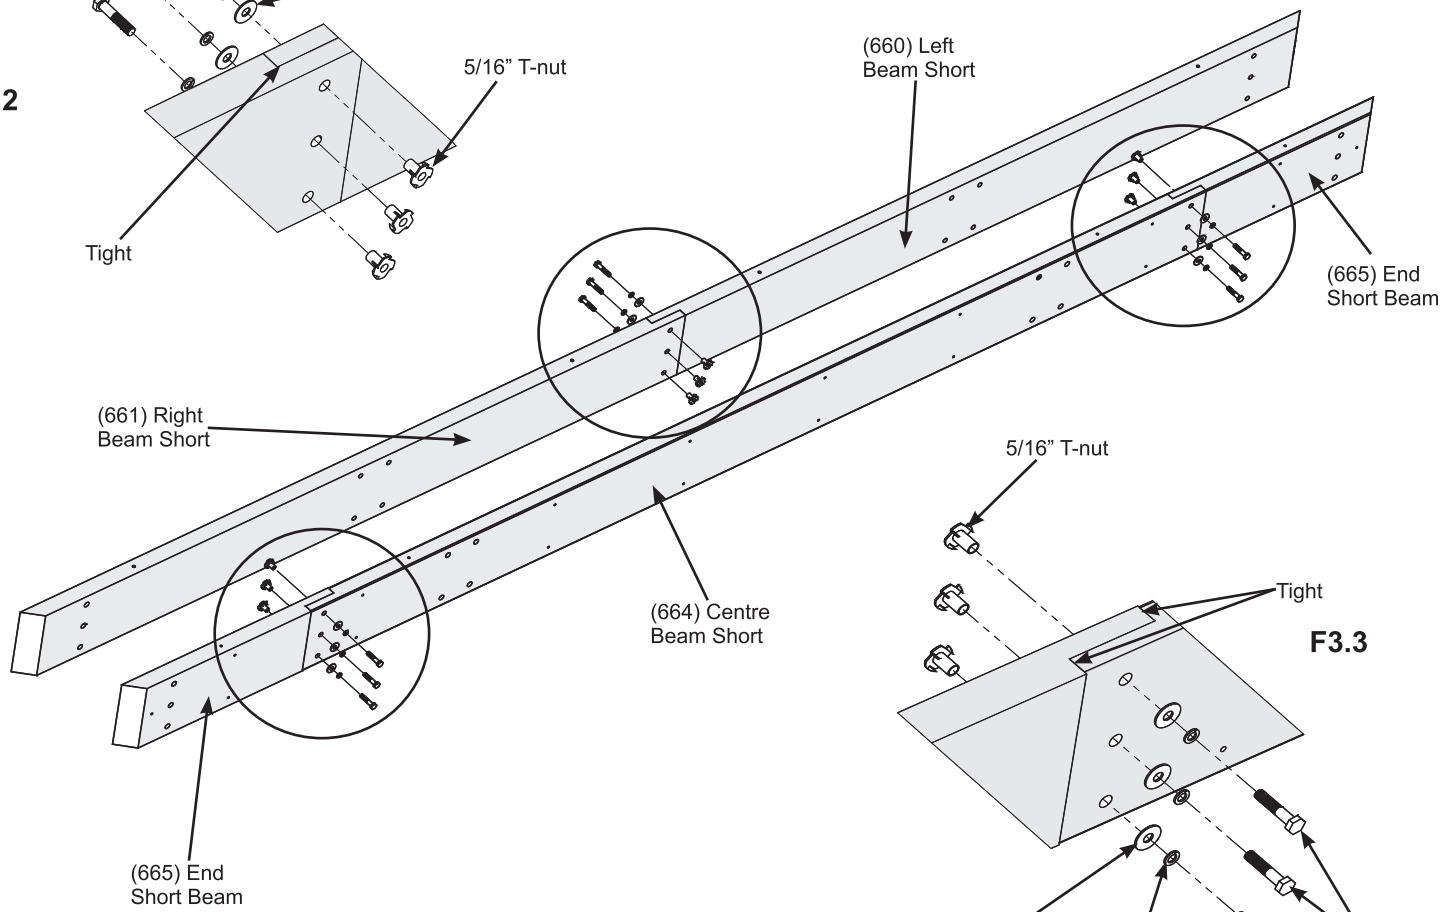

B: Connect one (665) End Short Beam to each end of one (664) Centre Beam Short using three 5/16 x 1-1/2” Hex Bolts (with 5/16” lock washer, 1/4-5/16” large washer and 5/16” t-nut) per end as shown in F3.1 and F3.3. Notice orientation of bolt heads.

C: Repeat Steps A and B one more time to make two Short Beam L-R Assemblies and two End Short Beam Assemblies.

(5/16” lock washer, 1/4-5/16” large washer, 5/16” t-nut)

Step 5: Frame Assembly and Anchoring
Part 1

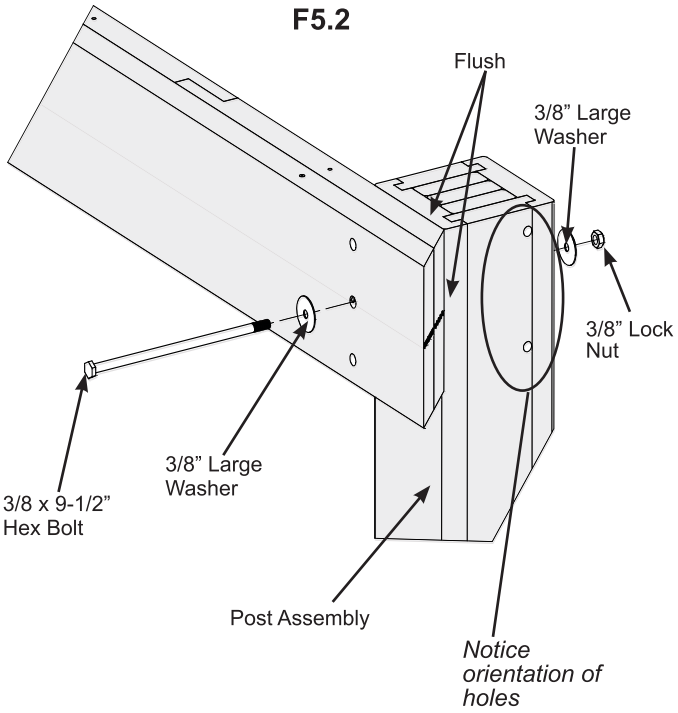

A: On a hard, flat surface place one Short Beam Assembly against the outside of two Post Assemblies, on the short side, flush to the tops and outside corners. Attach Beam to Post, through the middle hole, with one 3/8 x 9-1/2" Hex Bolt (with two 3/8" large washers and one 3/8" lock nut) per Post. (F5.1 and F5.2)

The distance from the outside of one Post Assembly to the outside of the second Post Assembly should be 10' 10-3/8". See F5.3 for accurate positioning of Posts.

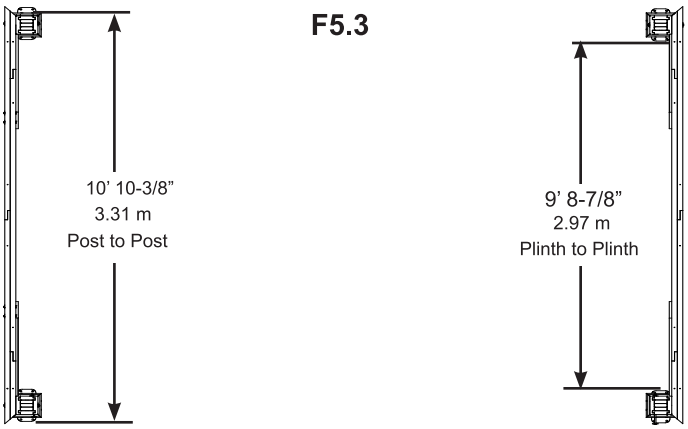

B: Repeat Step A for second Short Beam Assembly. These will now be referred to as Short Side Assemblies.

Note: The bevelled ends on each gusset should always face away from the wood it is attaching to.

C: Make sure each Short Side Assembly is square, top of Beam Assembly is flush to the top of the Post Assembly and angle of Beam Assembly is flush to the side of the Post Assembly, then facing one Short Beam Assembly from the outside place one (1017) Short Gusset RT on the right hand side so the top fits tight to the Short Beam Assembly and the bottom fits tight to the Post Assembly. Attach gusset to Short Beam Assembly with two 5/16 x 3-3/4" Hex Bolts (with 5/16" lock washer, 1/4-5/16" large washer and 5/16" t-nut). Pre-drill with a 1/8" drill bit then attach gusset to Post Assembly with three 1/4 x 1-15/16" Lag Screws (with 1/4-5/16" large washer). (F5.4 and F5.5)

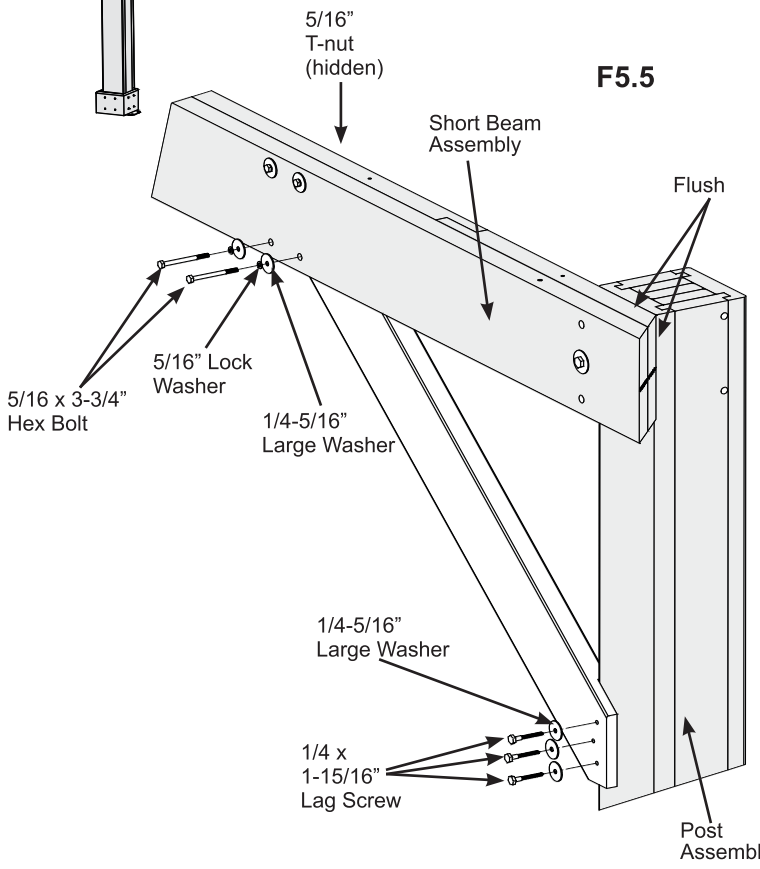

D: Repeat Step C on the left hand side with one (1016) Short Gusset LT. (F5.4 and F5.5)

Step 5: Frame Assembly and Anchoring Part 3

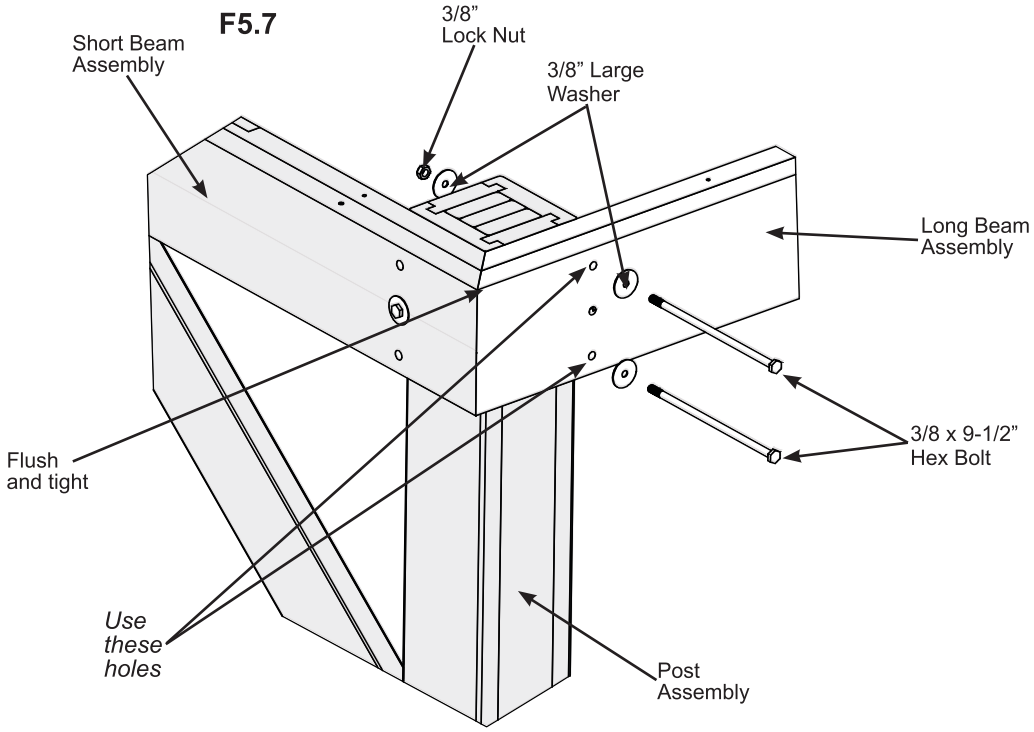

F: Move your Short Side Assemblies to the final location. Make sure the ground is flat and level before continuing assembly.

G: With helpers stand up Short Side Assemblies then place one Long Beam Assembly against the outside of two Post Assemblies, flush to the tops and outside corners and tight to Short Beam Assembly. Attach Long Beam Assembly to Post Assembly through the top and bottom holes with two 3/8 x 9-1/2" Hex Bolts (with two 3/8" large washers and one 3/8" lock nut) per Post Assemby. Repeat for the second Long Beam Assembly on the opposite side. (F5.6 and F5.7)

Note: The bevelled ends on each gusset should always face away from the wood it is attaching to.

H: Make sure the Frame Assembly is square and level then facing one Long Beam Assembly from the outside place one (1012) Straight Gusset Right on the right hand side Post Assembly so the top fits tight to the Long Beam Assembly and the bottom fits tight to the Post Assembly. Attach gusset to Long Beam Assembly with two 5/16 x 3-3/4" Hex Bolts (with 5/16" lock washer, 1/4-5/16" large washer and 5/16" t-nut). Pre-drill with a 1/8" drill bit then attach gusset to Post Assembly with three 1/4 x 1-15/16" Lag Screws (with 1/4-5/16" large washer). (F5.8, F5.9 and F5.10)

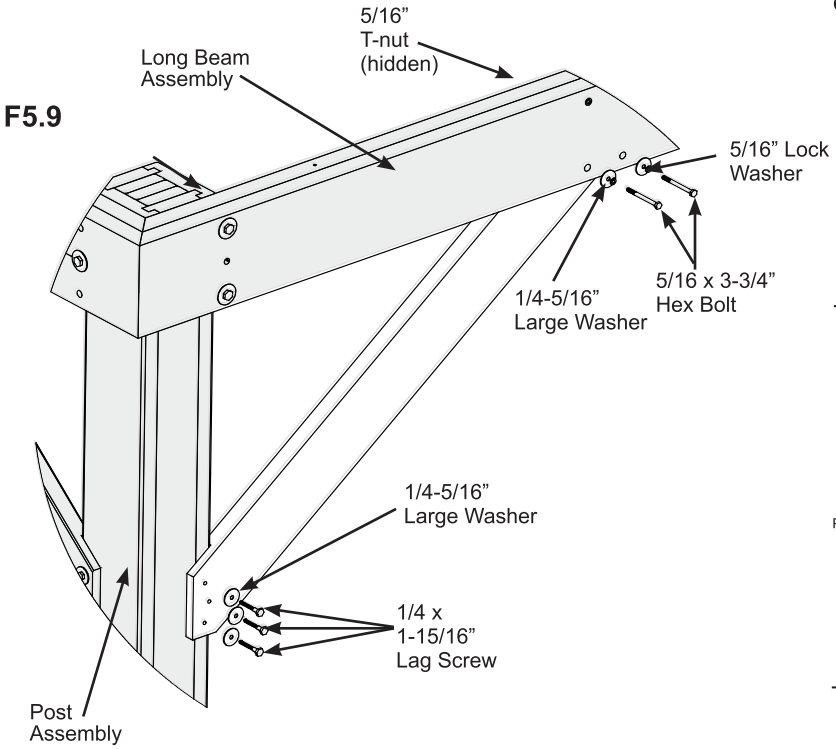

I: Repeat Step H to install (1011) Straight Gusset Left on the left hand side Post Assembly. (F5.8 and F5.9)

Step 5: Frame Assembly and Anchoring
Part 5

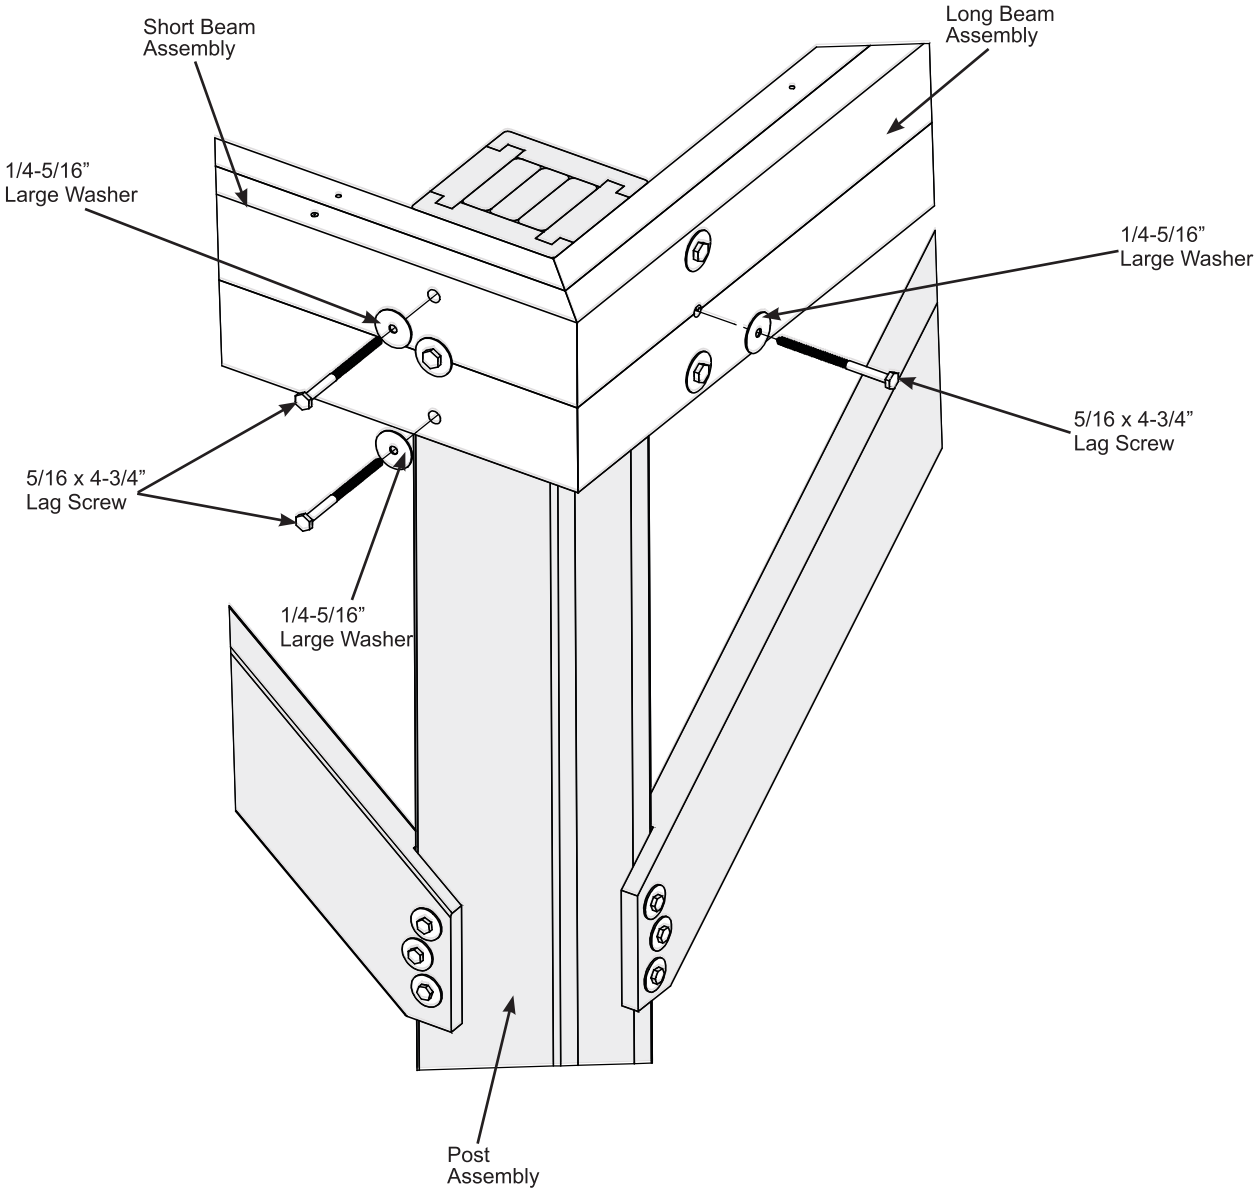

K: Pre-drill with a 1/8” drill bit then attach Long Beam Assemblies to Post Assemblies with one 5/16 x 4-3/4” Lag Screw (with 1/4-5/16” large washer) per corner in the middle holes and Short Beam Assemblies to Post Assemblies with two 5/16 x 4-3/4” Lag Screws (with 1/4-5/16” large washer) per corner in the top and bottom holes. (F5.11)

L: Depending on what you are placing the Gazebo on will determine how you anchor it to that surface. Please refer to pages 6 and 7 for installation examples.

Any hardware or extra materials for

mounting will have to be purchased in advance.

INSTALLING ROOFING MATERIAL

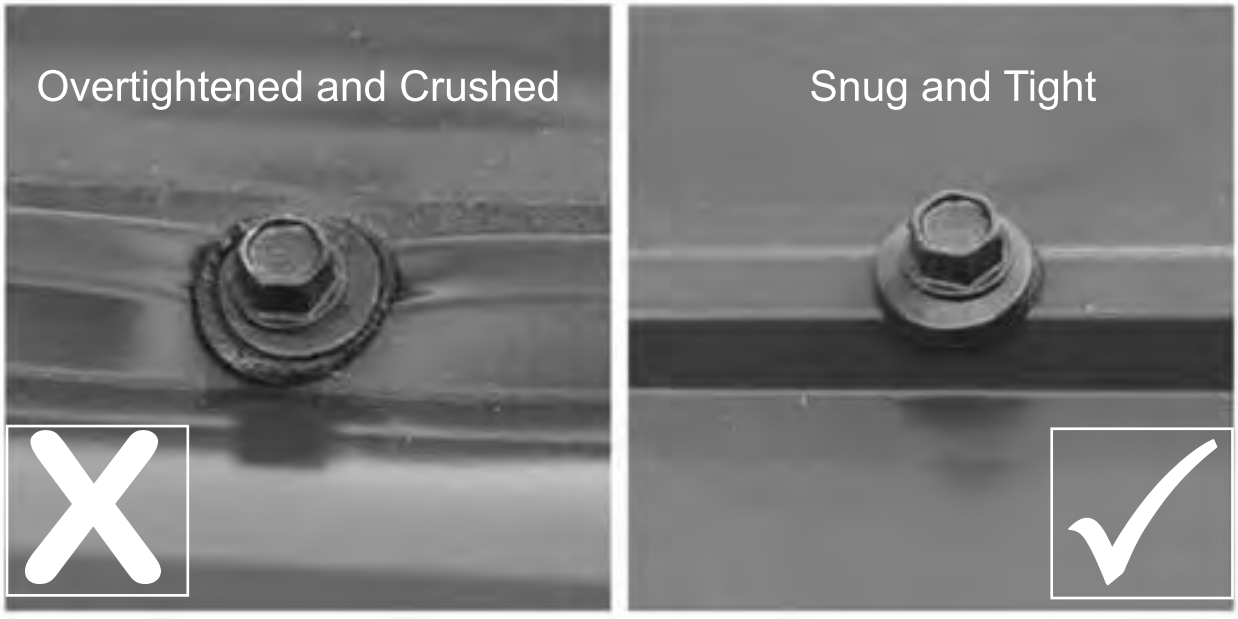

CAUTION!

Roofing material may have sharp edges! Wear gloves!

HANDLE WITH CARE!

Place roofing material on a non-abrasive surface before assembly as it can bend, dent and scratch easily.

WARNING – DO NOT OVER TIGHTEN ROOFING SCREWS!
Over tightening screws will cause roofing material to crush.

The roofing screws can easily crush the Roof Panels and Roof Edges when using a power drill. We recommend hand tightening the roofing screws so that they sit snug and tight to the roofing material.

Step 21: Attach Roof to Beam Brackets - Small Roof Assembly

A: On each Small Roof Assembly, through the bolt hole at the bottom of the board, loosely attach one Roof to Beam Bracket to each rafter with one 1/4 x 2" Hex Bolt (with two 1/4-5/16" large washers and one1/4" lock nut) per bracket. (F21.1 and F21.2)

B: Push panels up from the outside and inside top to make sure each (648) Soffit is tight to the Short Beam Assemblies then fasten each Roof to Beam Bracket with three #12 x 1-1/2" Pan Screws per bracket. Install top screw into the rafter first then install the other two into the beam. Slight gaps are normal. (F21.1 and F21.2)

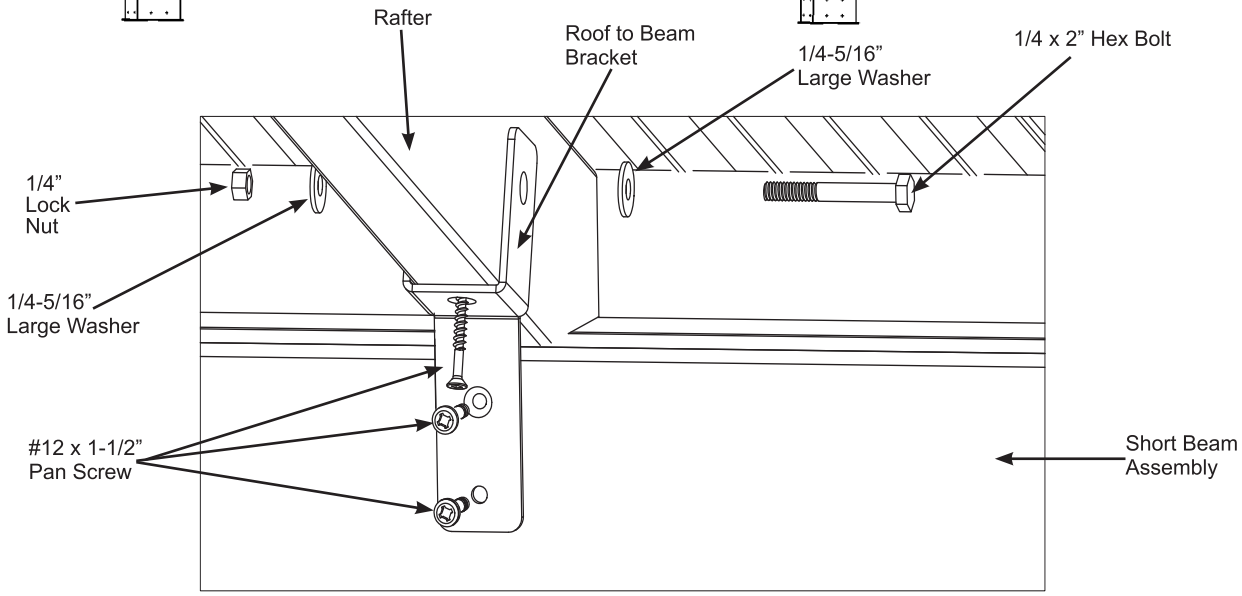

C: Tighten all Roof to Beam Bracket bolts in both Small Roof Assemblies.

Step 23: Attach Ridge Caps to Roof Panels

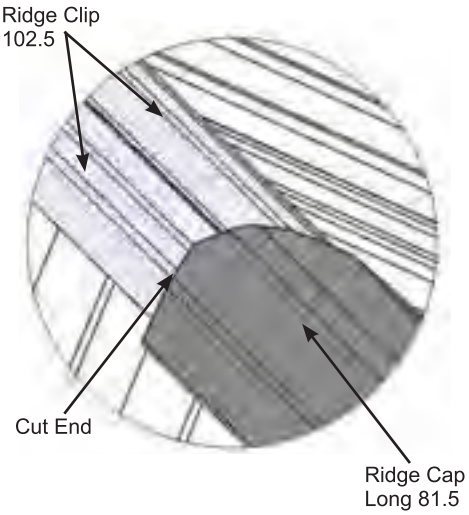

A: At each corner, slide one Ridge Cap Long 81.5 over the Ridge Clips, from the bottom up with cut end leading. (F23.1 and F23.2)

B: Slide Ridge Cap Short 25.2 over the Ridge Clips leading with the insert end to push the Ridge Cap Long 81.5 to the top, lifting Peak Cap Assembly so Ridge Cap Long 81.5 fit under. Attach with two #8 x 3/4" Sheet Metal Screws per Ridge Cap set. (F23.1, F23.3, F23.4 and F23.5)

F23.1

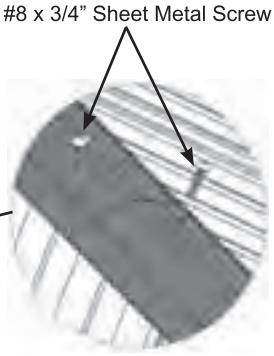

F23.2

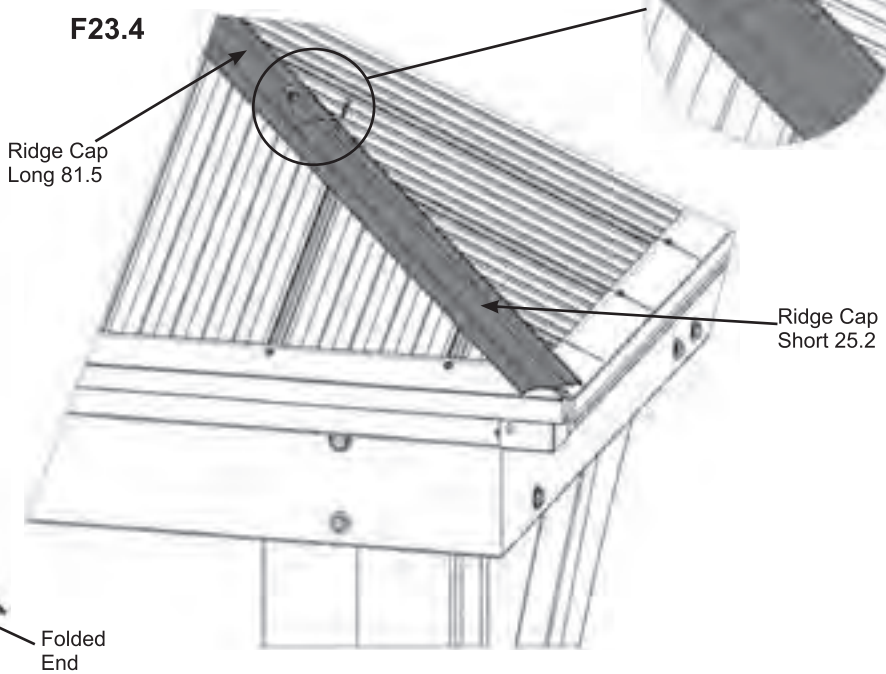

Note: To help Ridge Caps slide on easier use a lubricant such as liquid soap.

Step 24: Secure Roof Peak Detail

A: Insert one 1/4” Nut into two Peak Loops. Be careful nut is loose and will fall out until attached to Carriage Bolt. (F24.1)

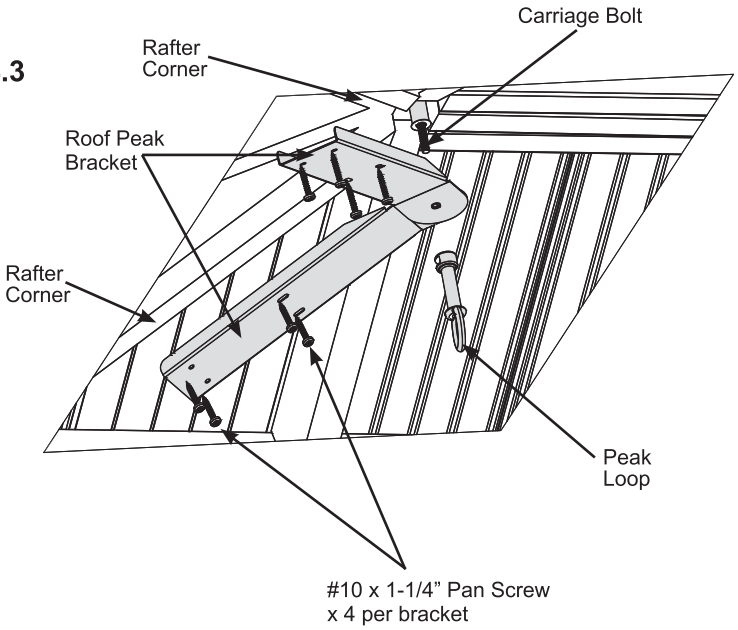

B: Insert two Roof Peak Brackets through each end Carriage Bolt, so they fit over the Rafter Corners, and attach Peak Loops to Carriage Bolts then twist to tighten. (F24.2, F24.3 and F24.4)

C: Attach each set of Roof Peak Brackets to the Rafter Corners of the connected Large and Small Roof Assemblies in the slotted holes with four #10 x 1-1/4” Pan Screws per bracket. (F24.2, F24.3 and F24.4)

Components:

2 x Peak Loop
2 x 1/4” Nut
4 x Roof Peak Bracket

Hardware

16 x #10 x 1-1/4” Pan Screw

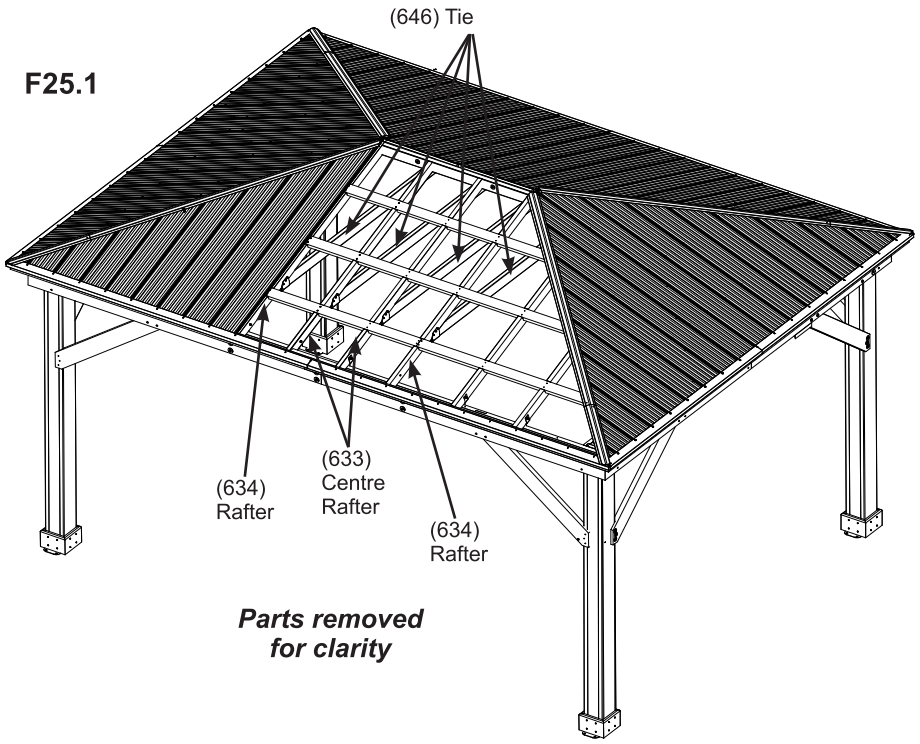

Step 25: Attach Tie Wrap Brackets and Ties

A: Attach one Tie Wrap Bracket tight to each end of four (646) Ties with one #10 x 1-1/4" Pan Screw per bracket using the inside holes. (F25.2 and F25.3)

B: With a helper place one (646) Tie with brackets against each (633) Centre Rafter and each (634) Rafter on Large Roof Assemblies so (646) Tie is tight to the rafters and are level. Attach Tie Wrap Bracket to Rafters with two #10 x 1-1/4" Pan Screws on both sides of each bracket. (F25.1, F25.2 and F25.3)

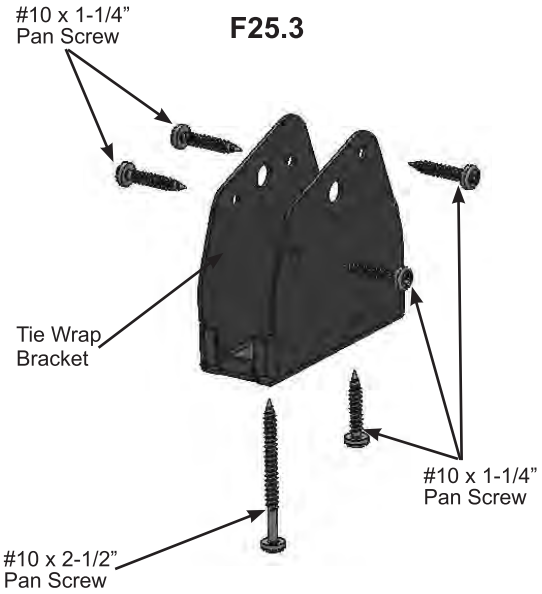

C: Pre-drill with a 1/8" drill bit and secure Tie Wrap Brackets to (646) Ties and Rafters with one #10 x 2-1/2" Pan Screw per bracket. (F25.1, F25.2 and F25.3)

Step 27: Metal Hooks and Plaque

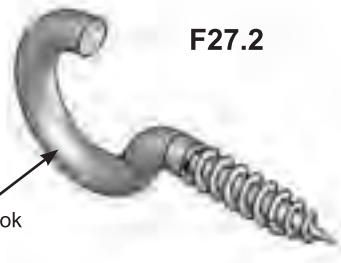

A: Two 50 mm Hooks are included with this unit for attaching wiring. They can be placed anywhere along the Rafters as needed. Pre-drill with a 1/8" drill bit before installing. (F27.1 and F27.2)

B: Attach Gazebo ID Plaque to a prominent location on your gazebo with two #10 x 1-1/4" Pan Screws. This provides warnings concerning safety and important contact information. A tracking number is provided to allow you to get critical information or order replacement parts for this specific model. (F27.1 and F27.3)

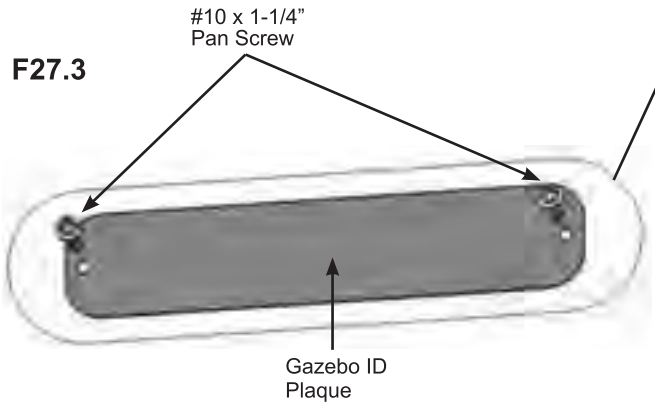

F27.1

F27.2

F27.3

Note: We have provided two 50 mm hooks for optional use to hold in place any wires if required. These hooks are not designed to hold any heavy products such as lights, flower pots, etc.
