

Obtaining a permit for your Best Barns shed or garage kits

*Do-it-Yourself kits from Best Barns are designed for use as storage buildings or garages only. Use for any other purposes is neither implied nor inferred.**

Building code offices and HOA's may require additional documents to obtain a permit. The homeowner's first step is to contact their local code office and ask what is needed for the size of building to be purchased.

Typically, the necessary documentation may include some or all of the following.

- o Elevations showing at least two sides of structure.
- o Site plan showing existing structures and proposed build site.
- o Engineered drawings for truss system indicating snow and wind load ratings.**
- o Cross sections of wall framing and foundation.
- o Tie down locations for high wind load areas.***

Permit requirements vary based on location. Some areas may not require a permit at all. The documents provided by Best Barns are intended to help the homeowner with the permit process but do not guarantee a permit will be issued. It is the homeowner's responsibility to determine if a permit is required and submit the necessary documentation.

*Any alteration to the construction of Best Barns sheds or garages may require the services of a civil engineer to meet local building codes. Best Barns cannot provide these additional services.

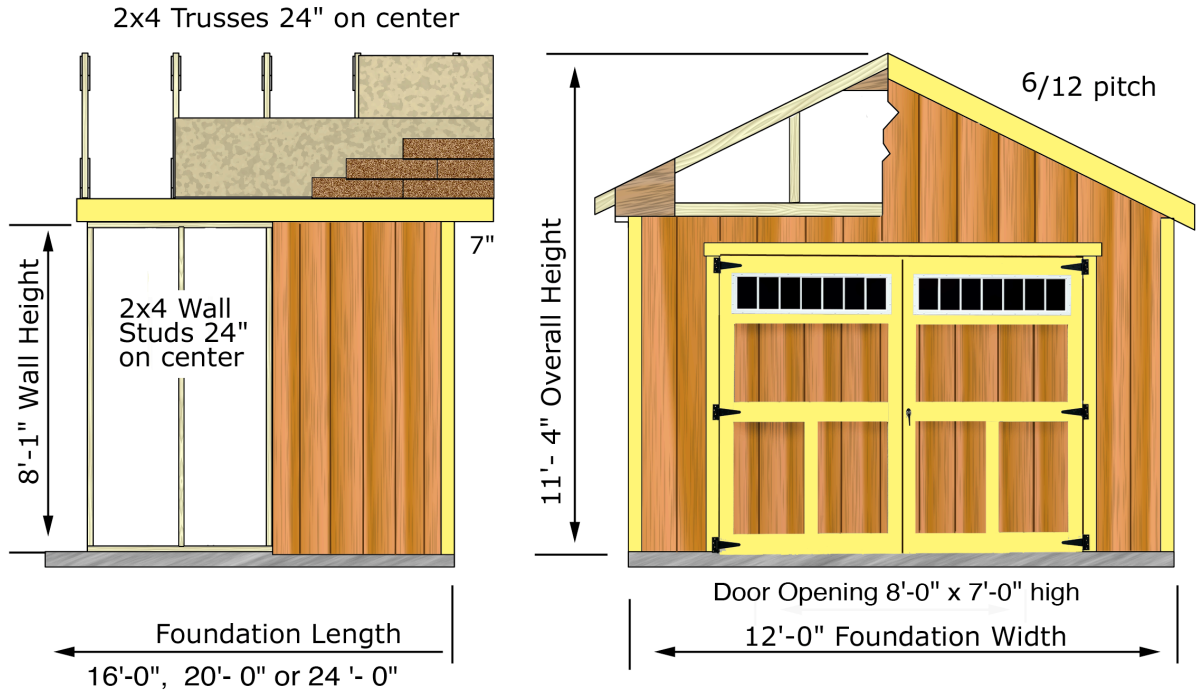

** Engineered truss drawings stamped for your individual state can be obtained upon request. Some models do not have wind and snow load ratings. A deposit will be required if the shed or garage kit has not yet been purchased. Contact us directly at 800-245-1577 for further details.

*** Certain states such as Florida and California have stringent requirements for obtaining a permit. Depending on your location, a civil engineer's services may be required to provide necessary documents. These services are the homeowner's responsibility to obtain and are not included in the purchase of a shed or garage kit.

Before you order our kit or begin construction, obtain a building permit. If additional documents are required contact questions@barnkits.com.

Dover Elevations

Floor: Sold optionally

Wall Framing: 2x4 Construction with 24" on center stud spacing, with top wall plate and tie plates and single treated bottom plate.

Siding: Louisiana-Pacific 8" o.c. groove 'Smart Panel' primed with 50 year warranty, 5 year labor replacement.
