IMPORTANT INFORMATION ABOUT YOUR KIT

Thank you for purchasing our kit. Please read the following information before beginning construction. Always check with your local HOA or building code office for any requirements or restrictions.

Floor: Wood flooring is sold optionally. You may choose to build your own or pour a cement pad.

Always wear safety glasses when cutting or nailing!

Tools Required: Hand or Circular Saw Level Safety Glasses
Cordless Drill Measuring Tape Dust Mask

Hammer 6'-8' Ladder(s) Phillips Screwdriver
Pencil Framing Square

Additional Materials - Not included in kit:

Windows are purchased separately

Required: Shingles or metal roofing, Drip Edge, Roofing Nails or Screws, Paint

Optional: Caulk, Ridge Vent

Terminology:

Square - Confirm corners are at 90 degrees

Plumb - Confirm walls and trusses are straight vertically

Wall Plate - Top and bottom 2x4s used to frame walls

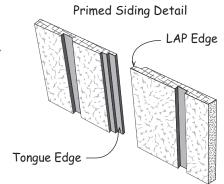

Tie Plate - 2x4s connecting wall sections together

Header - Spans top of door opening

OSB - Oriented Strand Board

LAP - Edge of siding that overlaps Tongue

Tongue - Edge of siding that is overlapped

Organize:

Unpack all items & organize according to size and type. This will make items easier to find when instructed.

Review the parts list on the back page. Should there be missing items or sub-par material contact Best Barns Customer Service.

DO NOT discard any material including the pallet until your project is complete.

Assembly:

Review all instructions before you begin. Please follow steps carefully and in sequence for successful results.

If you have any questions we are happy to assist you. Please contact us at:

800-245-1577 - Mon - Fri 8AM - 5PM EST

724-866-4357 - After hours and weekends

Email - questions@barnkits.com

Constructing Details for Deluxe Floor System

Deluxe floors include 4x4 runners, standard floors do not

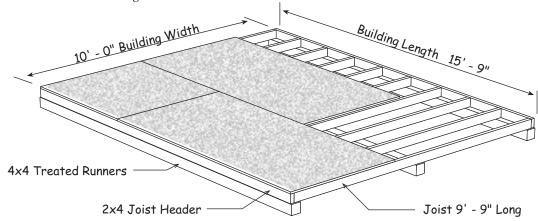

Foundation size is 10'-0" x 15'-9". Check local building codes in your area, the construction may have to change. For a concrete slab, install sill sealer as a moisture barrier between the concrete and the wall plates. Foam sill sealer can be purchased at home centers in rolls 3-1/2" or wider.

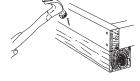

1. Cut 2x4-16' joist headers to 15' - 9".

Layout for 16" on center joist spacing. 'X' marks where floor joist will be placed.

Joist Header	X	X	X	X	$\overline{}$
	X	X	X	X	
	-	15-1/4" >	16" →	16" →	

2. Cut 2x4-10' floor joist to 9'-9". Treated lumber may be thicker than 1-1/2". Take this into account when cutting the length of floor joists. Shorten joist measurements if necessary to obtain 10'-0" building width.

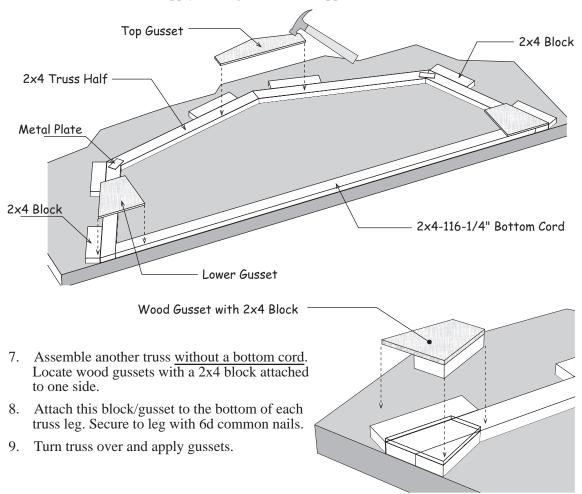

Nail the 2x4s to the 4x4 runners to keep the 2x4 frame from moving.

It is important that the floor be level and square. Before nailing the flooring, measure the floor diagonally (corner to corner); then measure the opposite corners. These measurements will be the same when the floor is square.

Material Description	10' x 16' shed			
2x4 Joist Headers	2 pcs. 16'			
2x4 Floor Joist	13 pcs. 10'			
4x4 Treated Runners	6 pcs. 8'			
Flooring 5/8" or 3/4"	5 pcs. 4x8			
Screw Floor Nails	2 lb. 8d			
Galv. Box Nails	1 lb. 16d			

Step 1 Assemble Trusses

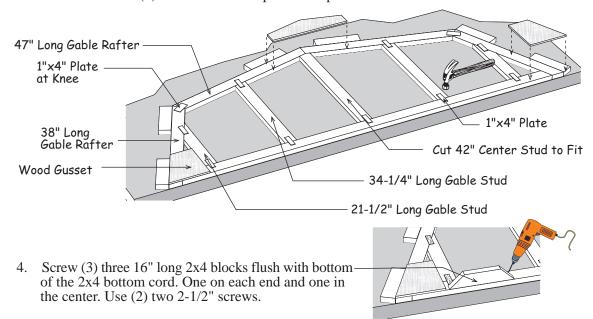

- 1. Position (2) two truss halves together so that a 116-1/4" long 2x4 bottom cord may be placed between them.
- 2. Hold truss parts in place by temporarily screwing 2x4 blocks to the floor. There are short 2x4 blocks supplied in the kit for this purpose. Use 2-1/2" wood screws.
- 3. Secure the tops together with a a wood gusset. Nail the gusset with (16) sixteen 6d common nails. Space nails evenly.
- 4. Secure the truss bottom legs to the bottom cord with wood gussets. **Note**: You may have to spread the truss bottom to fit the bottom 2x4. Use 12 nails per gusset. Space nails evenly.
- 5. Assemble (5) five more trusses.
- 6. Turn trusses over and apply wood gussets to the opposite side.

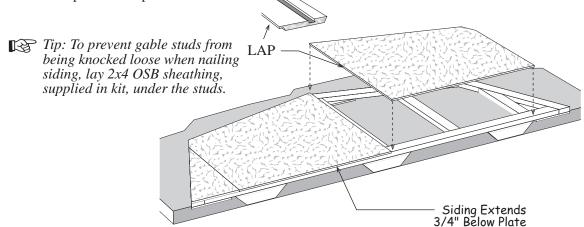

Do Not remove blocks from floor until **Step 2** is completed.

Step 2 Assemble Rear Gable

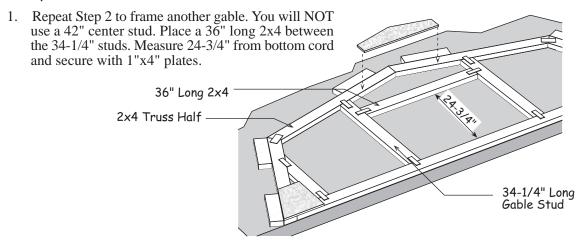

- 1. **IMPORTANT:** Do no use truss halves to make gables. Place (2) two 47" long, (2) two 38" long 2x4 gable rafters and a 116-1/4" bottom cord in the truss jig. Secure at knee with 1"x4" drive-on plates. Secure bottom cord with gussets.
- 2. Select a 42" long 2x4 center stud and cut to fit between ridge and bottom cord.
- 3. Install (2) two 21-1/2" and (2) two 34-1/4" with angle cut on one end. Secure 2x4 gable studs to the truss with (9) nine 1"x4" metal plates at top and bottom.

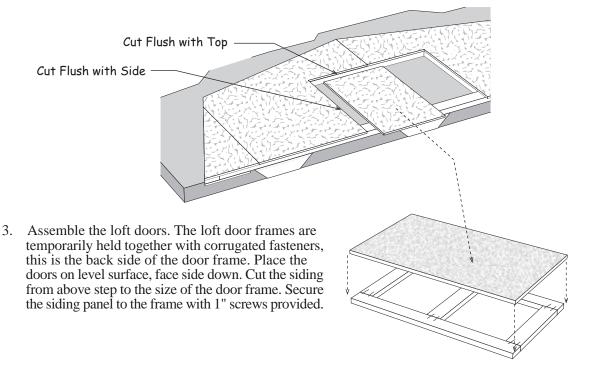

5. Turn the gable over. Locate pre-cut gable siding. Starting from left install the siding extending 3/4" below the bottom 2x4. Insure the siding does not extend above the top frame. Use 6d galv. nails spaced 12" apart.

Step 3 Assemble Front Gable

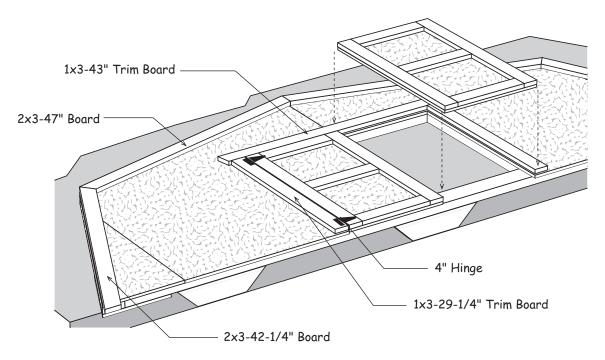

- If you don't need loft access from the outside, attach loft door frames to the gable to create a decorative look and weather tight storage area.
- 2. Turn the gable over. Lay out the first (2) two pieces of siding on frame. **Important: Do not nail to frame.** Mark and cut so siding is flush with top and left side of opening. Cut to bottom of siding below gable plate. Nail first two pieces of siding to frame. Lay out next siding panel, do not nail, and repeat cut for right side door opening. Nail last two pieces of siding to frame.

Step 4 Install Front Gable Overhang and Front Loft Doors

- 1. Apply 47" long 2x3 boards to the front gable. Install flush with the top of the gable frame. Use 10d sinkers
- 2. Install a 42-1/4" long 2x3 at the sides of the gable, flush with the frame. Board will extend below siding.
- 3. Install 29-1/4" long 1x3 trim boards on each side of the loft door opening. Install a 43" long trim board across the top. Use 6d galv. nails spaced 8" apart.
- 4. Install loft doors using 4" hinges and 1-1/4" long hinge screws. The screws have a square head. The bit is packed with the screws. Install barrel bolts to the inside top of the doors to secure doors when closed. When door is closed mark where bolt will hit 2x4 gable frame. You will need to drill a 1/4" hole into the underside of the 2x4.

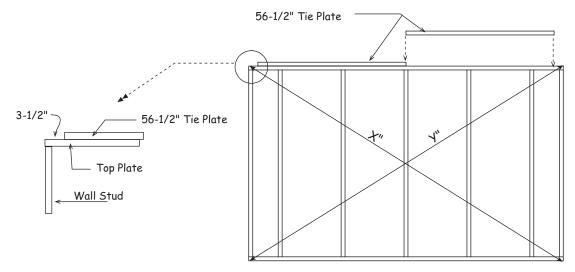

Step 5 Layout Plates for Back Wall

Position (2) two 2x4-10' boards together and indicate with 'X' marks, where the wall studs will be located.

		10° - 0" Wall	Plate	
X	X	X	X	
X	X	X	X	
<u> </u>	<u>′4"</u> <u>24"</u>	→ < 24"		

Step 6 Assemble Back Wall

- 1. Install 72" wall studs between the top and bottom plates. Nail studs to plate using (2) two 10d sinkers on each end of the stud.
- 2. Install (2) two 56-1/2" long 2x4 as tie plates over the top plate. The 2x4s will be 3-1/2" short of the end of the wall frame.

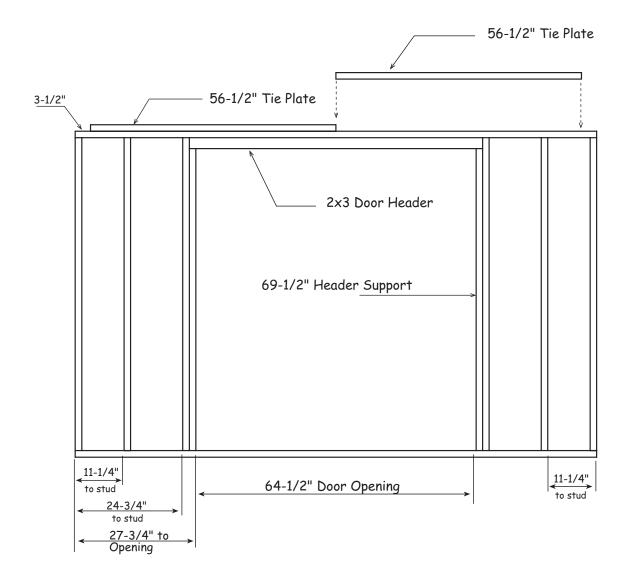

- 3. Square wall frame. *Measure diagonally (corner to corner)*. The two measurements (x" and y") will be the same when the wall is square.
- 4. Locate a 36-3/4" x 77-1/4" siding panel with the 'Tongue' edge. Install the siding panel on the left corner, with the 'cut edge' flush with the end of the wall and flush with the top of the 2x4 tie plate. The siding should extend below the bottom plate. Use the 6d galv. nails spaced 12" on center.
- 5. Install a 48-3/4" x 77-1/4" siding panel in the center of the wall frame.
- 6. Install a 36" x 77-1-4" panel with the 'LAP' edge last.

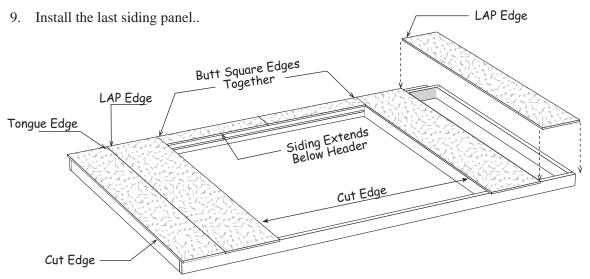

Step 7A Assemble Front Wall Panels

- 1. Install (6) six 72" wall studs between 2x4 10' top and bottom plates.
- 2. Cut (2) two 2x4-6' boards to 69-1/2" in length. Install a pre-built 2x3 door header and the 2x4s as header support under the door header.
- 3. Install (2) two 56-1/2" long 2x4 as tie plates over the top plate. The 2x4s will be 3-1/2" short of the end of the wall frame.
- 4. Square wall frame.

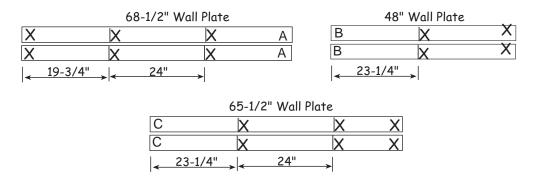

Step 7B Assemble Front Wall Continued

- 5. Locate a 16" x 77-1/4" siding panel that has a 'LAP' edge. Position the <u>'cut' edge</u> flush with the left side of the door opening. Do not nail the LAP edge until the other siding is applied.
- 6. Locate the 12-3/4" wide siding with a 'tongue edge' and install on the left end of the front wall.
- 7. Install (2) two 6" siding panels over the door opening, flush with the top plate. Siding will extend below header.
- 8. Install another 16" wide siding panel with the 'cut' edge flush with the side of the door opening.

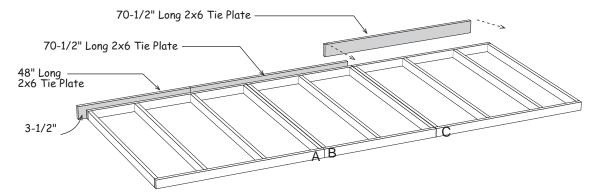

Step 8A Assemble Side Walls

1. Position 68-1/2", 48", and 65-1/2" long 2x4 boards together and mark where the wall studs will be located. Mark the ends that will butt together with the letters 'A', 'B' and 'C'.

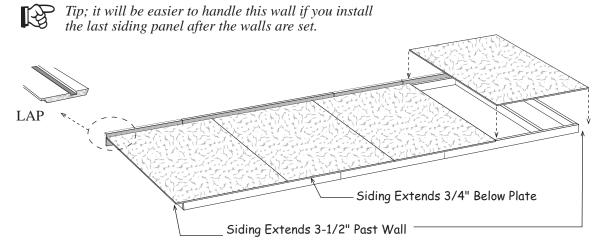

Step 8B Assemble Side Walls Continued

- 2. Install 72" wall studs between the top and bottom plates.
- 3. Nail frames together with 10d sinkers.
- 4. Install a 48" and (2) two 70-1/2" long 2x6 boards as tie plates over the top plate. The 2x6s will extend 3-1/2" beyond the ends of the wall frame.

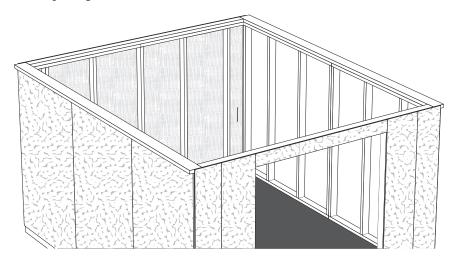

- 5. Locate (2) two siding panels that are 77-1/4" long and cut them to a length of 75-3/4".
- 6. Square wall frame. Install (4) four 75-3/4" long siding panels. Install the first siding panel with the 'LAP' edge extending 3-1/2" beyond the wall frame.
- 7. Install (2) two full width siding panel in the center.
- 8. Cut the last siding panel to extend 3-1/2" beyond the last wall stud.

9. Repeate to assemble another side wall frame and install (4) siding panels.

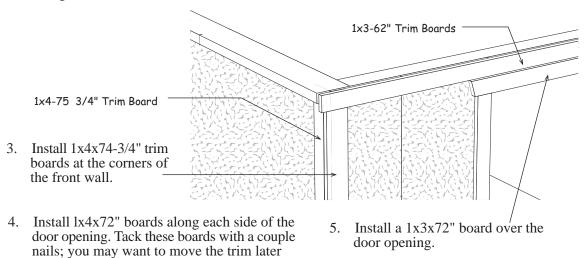

Step 9 Set Lower Walls

- 1. Secure wall panels together at the corners. Use (4) four 10d coated nails per corner. Nail wall panels to the floor. Nail through the bottom plate. Space 10d sinkers 24" apart.
- 2. Cut the 2x4 from door opening

Step 10 Install Trim

- 1. Install (2) two 1x3-62" long trim boards flush with the top of the front wall. Use 6d galv. nails.
- 2. Install 1x4-75 3/4" trim boards at the front corners of the sidewall. Install the trim flush with siding on the front wall.

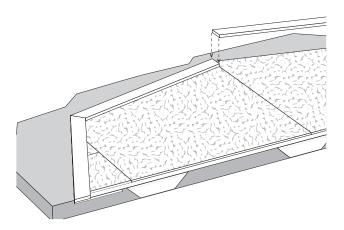

6. Install trim on the back of the building.

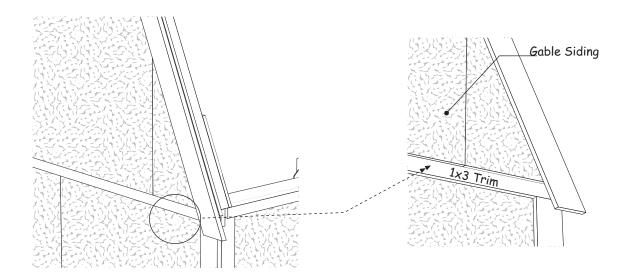

when you install the doors.

Step 11 Install Rear Gable

- 1. Apply 1x4 trim to gable. Install a 47-1/2" long 1x4 at the top of the gable. Install the 1x4 gable trim extending 1/2" above the siding on the gable. When installed later, the roof sheathing will be flush with the top of the trim.
- 2. Install a 43" long 1x4 at the sides of the gable, 1/2" above the siding on the gable.

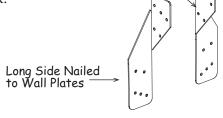

3. Install the rear gable on the back wall. The gable siding will <u>extend over the 1x3 trim</u> on the lower wall. **NOT behind the trim!** Secure gable to wall by nailing through the gable blocks with 10d sinkers. Nail siding along the 1x3 trim board with 6d galv. nails.

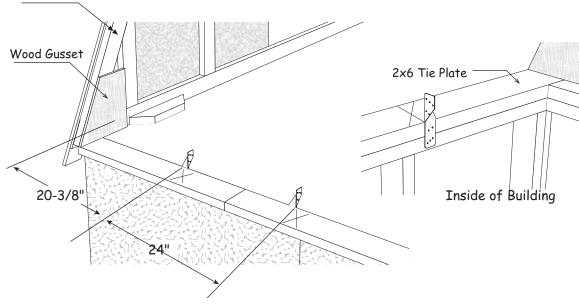

Layout for Truss Spacing Step 12

- 1. Layout the truss spacing on the left sidewall, facing building. Start at the back of the building. Measure from the <u>inside face of the wood gusset</u> when marking the location of the first truss.
- Locate the truss hangers, there are left and right hangers. Select the right hangers.

Rear Gable

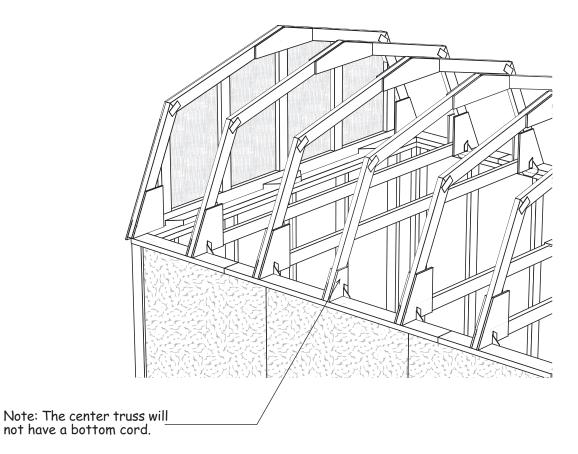

B **Important:** When marking the opposite wall, use the <u>left hangers</u> and place the 'X' mark on the same side of the line so your trusses

are parallel when they are installed.

Step 13 Install Trusses

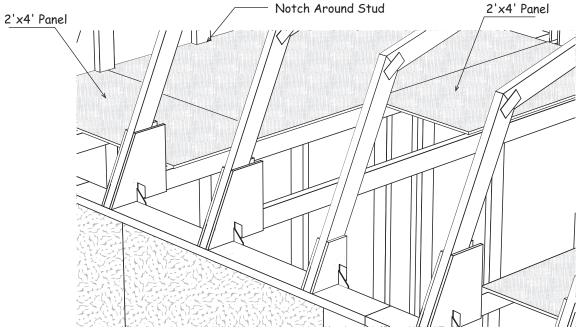

1. Install the trusses over the 'X' marks. Install hanger to the opposite side of the trusses. Secure truss to metal hangers using 1-1/2" hanger nails.

2. Install front gable.

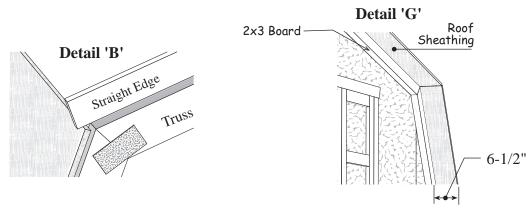

Step 14 Install Loft Floor

- 1. Install a 4' x 4' OSB flooring panel between the siding on the rear gable and the center of the 2nd truss. Notch the panel around the studs on the gable and cut the width to fit on the center of the 2x4 truss bottom. Note: Some OSB panels may be attached to the shipping pallet. Secure floor with 6d common nails spaced 12" apart.
- 2. Cut and install 2' x 4' OSB panels on each side of the center panel.

- 3. Install (2) two 2'x4' pieces as the 2nd row of flooring.
- 4. Install OSB flooring at the front of the building.

Step 15A Install Roof Sheathing - Supplemental Details

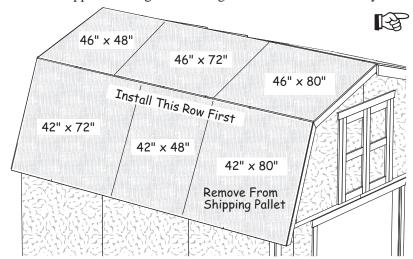

Step 15B Install Roof Sheathing

Install roof sheathing on the steep side of the roof. Use a straight edge to align the top of the sheathing with the top of the truss; see **Detail 'B'**. Make sure the trusses are plumb and the roof sheathing meets the center of the truss. Use 6d common nails spaced 8" apart.

The top roof sheathing will not extend to the ridge. This will allow an opening for air ventilation should you install a ridge vent.

- Working from rear gable install a 42" x 72" OSB sheet against back of trim. Install 42" x48" sheet next.
- 2. Install a 42" x 80" and cut (if necessary) to extend 6-1/2" past 2x3 board on front gable.
- 3. Install upper sheeting next cutting the 80" sheet if necessary.

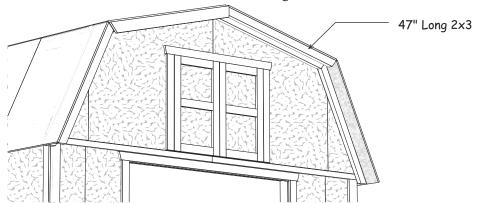

Important: Make sure the gable is plumb and the roof sheathing extends 6-1/2" past the 2x3s along the face of the gable; see

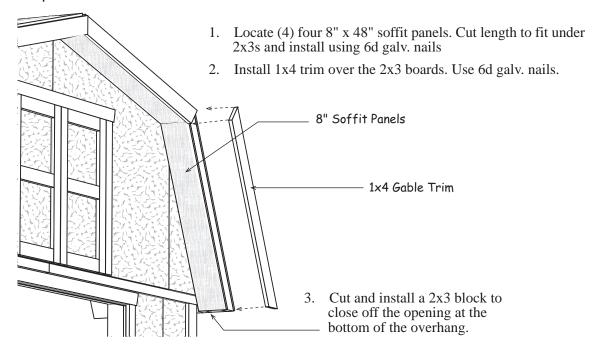

Detail 'G'

Step 16 Install Gable Overhang

- 1. While a helper holds the 47" long 2x3s under roof sheathing and against the front edge. Screw the sheathing to the 2x3s with 1-1/2" long screws.
- 2. Install the 42-1/4" 2x3s on the side roof sheathing in the same manner.

Step 17 Install Gable Soffit and Trim

Install Shingles - not included in kit

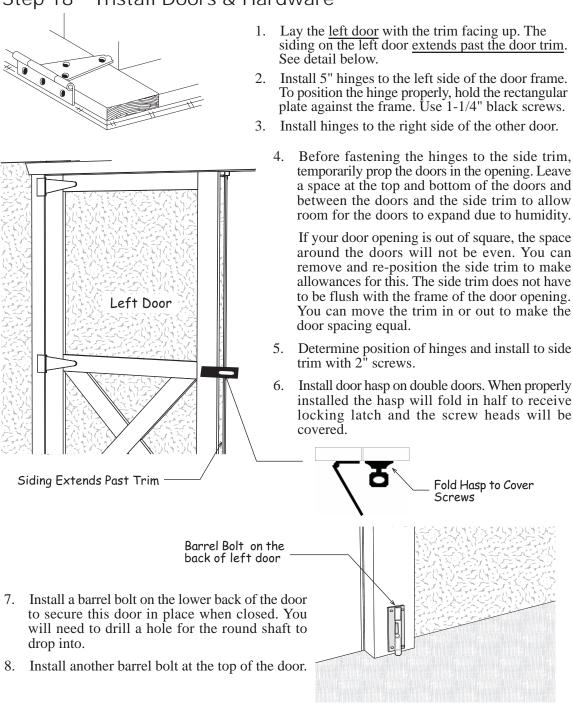

Install roof shingles per instructions on outside of wrapper.

Building Tip: Install ridge vent in lieu of shingles caps. Ridge vent provides ideal ventilation, preventing heat or moisture build-up from damaging your building or its contents.

Material Description	Quantity
Roof Shingles	10 bdl.
Roof 'drip' Edge	7 pcs.
